

Carbon Design Systems to Participate at ARM Connected Community Technical Symposium

WALTHAM, Mass.—October 15, 2007— Carbon Design Systems

Who: Carbon Design Systems(TM), the leading supplier of tools for the automatic creation, validation and deployment of virtual hardware models.

What: Will participate in the ARM Connected Community Technical Symposium, one of 19 ARM partners.

When: Tuesday, October 16, 2007

Where: Tokyo Convention Center Shinagawa in Tokyo.

More details can be found at: http://www.arm.com/events/tech_symp_japan.html.

About Carbon Design Systems

Carbon is the leading supplier of system-level tools to automatically create, validate and deploy software models generated from Verilog and/or VHDL descriptions. Carbon's models are used in conjunction with SystemC simulation platforms to enable architecture profiling and software validation in parallel with hardware development. Problems can be found and resolved early in the design cycle, rather than waiting for prototypes to be built or silicon to be delivered. Its solutions are based on open industry standards, including SystemC, SCML, Verilog, VHDL, OSCI TLM, MDI, CASI, CADI and CAPI. Carbon's customers are systems, semiconductor, and IP companies that focus on communications, networking, and consumer electronics. Carbon is headquartered at 375 Totten Pond Road, Waltham, Mass., 02451. Telephone: (781) 890-1500. Facsimile: (781) 890-1711. Email: info@carbondesignsystems.com. Web site: www.carbondesignsystems.com.
