**Carbon Design Systems' Popular Webinar Series Continues With  
Seminar on Automatic Model Generation for CoWare Platform Architect  
*July 24 Tutorial Intended for Software Developers, Hardware Architects,  
Firmware Designers***

**Waltham, Mass. — July 19, 2007 —**

**Who:** Carbon Design Systems™, the leading supplier of tools for the automatic creation, validation and deployment of virtual hardware models.

**What:** Will host a webinar on automatic model generation for the Platform Architect design environment from CoWare®. Attendees will learn how to quickly develop hardware-accurate models, accelerate the execution of a virtual platform and concurrently debug real software against a model of the actual hardware implementation.

**When:** Tuesday, July 24, at 2 p.m. E.D.T (11 a.m. P.D.T.)

**Where:** Online webex webinar through web browser.

**Webinar Registration:**

**About Carbon Design Systems**

Carbon is the leading supplier of system-level tools to automatically create, validate and deploy software models generated from Verilog and/or VHDL descriptions. Carbon's models are used in conjunction with SystemC simulation platforms to enable architecture profiling and software validation in parallel with hardware development. Problems can be found and resolved early in the design cycle, rather than waiting for prototypes to be built or silicon to be delivered. Its solutions are based on open industry standards, including SystemC, SCML, Verilog, VHDL, OSCI TLM, MDI, CASI, CADI and CAPI. Carbon's customers are systems, semiconductor, and IP companies that focus on communications, networking, and consumer electronics. Carbon is headquartered at 375 Totten Pond Road, Waltham, Mass., 02451. Telephone: (781) 890-1500. Facsimile: (781) 890-1711. Email: [info@carbondesignsystems.com](mailto:info@carbondesignsystems.com). Web site: [www.carbondesignsystems.com](http://www.carbondesignsystems.com).
